

KEYING & COMBINATION OPTIONS

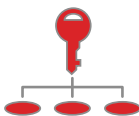

ONE UNIQUE SET OF KEYS FOR EACH LOCK

KD KEYED DIFFERENTLY

EXAMPLE USE: HOME, STUDENT

An excellent option for individual end users and situations that don't require administration or a key recovery system. One unique set of two keys is assigned to each lock.

ONE KEY OPENS ANY LOCK

KA KEYED ALIKE

EXAMPLE USE: COMPUTER LAB, CALL CENTER

All the locks within a set are keyed the same; thus, any key will open any lock. Perfect for an environment such as a school or lab, or for any situation where the end user is not authorized to unlock equipment. The key is typically managed by an administrator.

MASTER KEY OPENS ANY LOCK

UNIQUE SET OF KEYS FOR EACH END USER

MK MASTER KEYED

EXAMPLE USE: OFFICE W/ MOBILE WORKFORCE

Ideal when both centralized management and end user flexibility are required, each lock is keyed differently from the other and comes with its own unique set of two keys. A Master Key capable of unlocking any of the locks is used by a designated administrator. If a user loses a key, an administrator can unlock the equipment with the Master Key.

COMBINATION SET BY END USER

RS RESETTABLE COMBINATION

ACCESS: END USER

A perfect choice for individual end users who wish to choose their own combination and change it at will. Typically for situations that don't require administrative control or a key recovery system.

COMBINATION SET BY PC GUARDIAN

PS PRESET COMBINATOR

ACCESS: ADMINISTRATOR & END USER

Useful for administrator managed systems with individual end users. Locks are stamped with unique serial numbers, and corresponding combinations are pre-set at the factory and cannot be changed. Online access to serial numbers and combinations is available to authorized administrators.

COMBINATION SET BY END USER
FULL ADMINISTRATOR ACCESS

MC MASTER CODED SYSTEM

ACCESS: ADMINISTRATOR & END USER

An innovative solution for administrator managed systems that require end user flexibility. End users may set their own combinations and change them at any time. Authorized administrators can unlock or reset a lock at any time with the ComboGenie.
